NAME
  curl_formfree - free a previously build multipart/formdata HTTP POST chain

SYNOPSIS
  #include <curl/curl.h>

  void curl_formfree(struct curl_httppost * *form);*

DESCRIPTION
  curl_formfree() is used to clean up data previously built/appended with *curl_formadd(3)*. This must be
  called when the data has been used, which typically means after the *curl_easy_perform(3)* has been called.

RETURN VALUE
  None
