To configure your ZyAIR, use one of the following applications:
In Windows XP:
- ZyXEL ZyAIR Utility
- Zero Configuration
- Funk Odyssey Client

In Windows 98 SE/Me/2000
- ZyXEL ZyAIR Utility
- Funk Odyssey Client

Note:
It is recommended you use the ZyAIR Utility to configure your ZyAIR.
The bundled Funk wireless LAN utility only works for your ZyAIR. Do NOT use the Funk utility to configure non-ZyXEL WLAN adapters.

Known Issue:
After you plug and unplug a non-ZyXEL WLAN adapter, you cannot use the Funk utility to configure your ZyAIR again. To solve this problem, do one of the following
- Reboot your computer.
- Restart the utility.
